Github: github.com/Greg-Soap

Passionate full-stack web developer with 2 years of experience, proficient in crafting captivating web applications. I excel in front-end development using JavaScript, HTML, CSS, and React to breathe life into designs, while also leveraging back-end technologies like Node.js, MongoDB, Express, and AdonisJS for comprehensive solutions. An adept user of Framer Motion for adding engaging animations. Committed to innovation, I collaborate effectively and deliver exceptional solutions that align with business objectives.

SKILLS

Languages: JavaScript, TypeScript

Frameworks: React.js, Node.js, Express, AdonisJs, Next.js

Databases: MongoDB, MySQL

Styling: Sass, TailwindCSS, Styled Components, Framer Motion

WORK EXPERIENCE

Handiwoker Technologies (Junior Full Stack) April 2023 - till date, Remote

- Crafting dynamic digital experiences as a Full Stack Web Developer, employing technologies such as Styled Components, Next.js, and Storybook for captivating front-end development.
- Leveraged AdonisJS for backend development, implementing robust server-side functionalities that enriched user experiences and facilitated seamless data processing.
- Collaborated closely with design teams, actively participating in meetings to align technical implementation with mock designs, resulting in visually appealing and user-friendly web applications.

Frontend Web Developer November 2022 - till date, Remote

- Developed SEO-friendly, fast, and responsive custom landing pages for diverse clients, ensuring optimal performance across various devices.
- Translated client design mockups into interactive web layouts utilizing ReactJS and Sass, seamlessly combining aesthetics with functionality.
- Collaborated with backend developers to troubleshoot issues, enhancing problem-solving efforts and maintaining consistent branding while harmonizing functional and aesthetic design elements.

Tryve Technologies (Internship) March 2022 - October 2022, Remote

- Completed a rewarding internship gaining hands-on experience and contributing to real-world projects.
- Collaborated closely with the development team, actively participating in various phases of project development, from conceptualization to implementation.
- Acquired practical skills in web technologies and application development, enhancing proficiency in areas such as JavaScript, React.js, Node.js, and project collaboration.

EDUCATION

Web Development, Udemy 2022

Bachelor of Science, Electrical/Electronics Engineering, University of Benin 2016 - 2022

PROJECTS

Intricate Designs — <https://intricatedesignspaces.com/>

- Contributed as a team member to deliver a client's desired website on time and within budget.
- Developed a responsive web layout from a design mockup utilizing React.js and Sass.

Cocktails — <https://cocktails-nextjs-beta.vercel.app/>

- Designed and implemented a responsive web layout using React.js and Sass, ensuring optimal viewing experience across multiple devices.
- Developed and integrated a search functionality, enabling efficient and accurate retrieval of information.
- Incorporated a color scheme toggle feature, allowing users to seamlessly switch between light and dark modes for enhanced visual comfort and accessibility.
